

# Cloning Naru Noodle Bar Website: A Step-by-Step Guide

## Step 1: Understand the Purpose

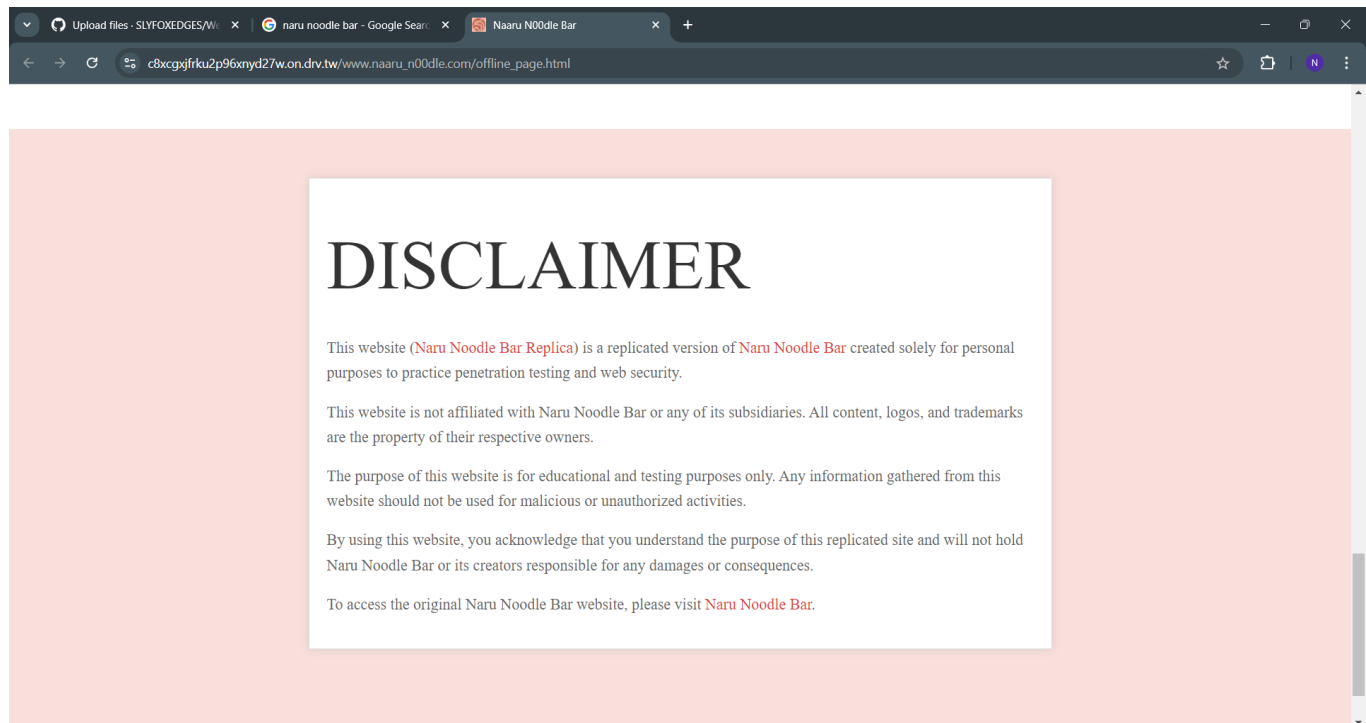

- Identify why you want to clone Naru Noodle Bar's website (educational purposes, development, testing)
- Consider the following:
  - Learning web development and design
  - Creating a backup or archive
  - Testing new features or updates
  - Using as a template for a new project

## Step 2: Get Permission

- Obtain permission from Naru Noodle Bar's website owner (if necessary)
- Verify the website's licensing terms (e.g., Creative Commons)
- Ensure compliance with copyright laws.

OR

At the least provide disclaimer at the end.

## Step 3: Choose the Right Tools

- Popular tools:

- HTTrack (free, open-source)
- Wget (free, open-source)
- Website Downloader (online services)
- Consider factors:
  - Ease of use
  - Speed and efficiency
  - Customization options

#### Step 4: Clone with HTTrack

1. Download and install HTTrack
2. Launch HTTrack and create a new project
3. Enter Naru Noodle Bar's website URL: (link unavailable)
4. Set additional options:
  - Limit download speed
  - Specify file types to include/exclude
  - Set output directory
5. Start cloning process

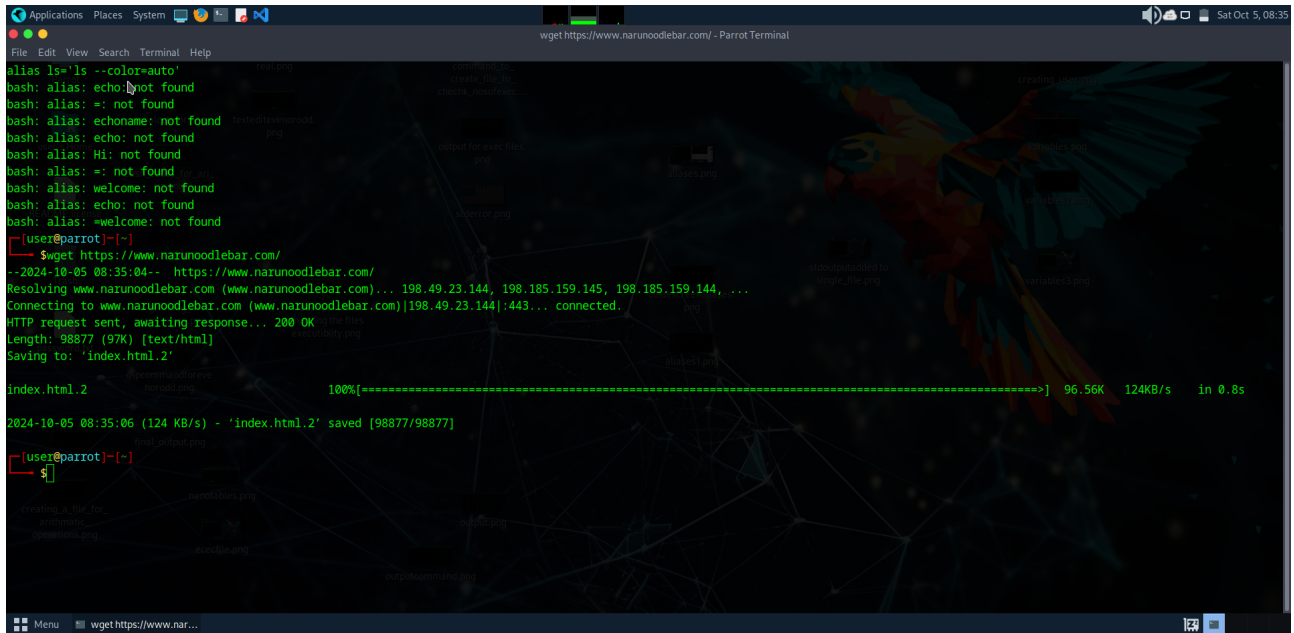

#### Step 5: Clone with Wget

1. Install Wget
2. Run command: `wget --mirror --convert-links --adjust-extension --page-requisites --no-parent` (link unavailable)
3. Replace (link unavailable) with Naru Noodle Bar's website URL

#### 4. Customize options:

- Set output directory
- Limit download speed
- Specify file types to include/exclude

```
Applications Places System wget https://www.narunoodlebar.com/ - Parrot Terminal
File Edit View Search Terminal Help

[user@parrot]~$
```

#### Step 6: Review and Customize

1. Update links to point to local files
2. Remove unwanted content (e.g., ads, analytics)
3. Customize content:
  - Update text and images
  - Modify layout and design
4. Test website functionality
5. Link generation after website cloning after google drive upload and authentication using drv.tw

Needs authentication

Due to malicious abuse by some users, we are strictly enforcing authentication of content ownership.

This site needs to be authenticated before its content can be shown. If **you are the owner of this site**, please provide an **organizational** email address (school, company, etc., **not Gmail nor Outlook email**) to verify your identity.

## Step 7: Set Up Local Development Environment

### 1. Choose a local server solution:

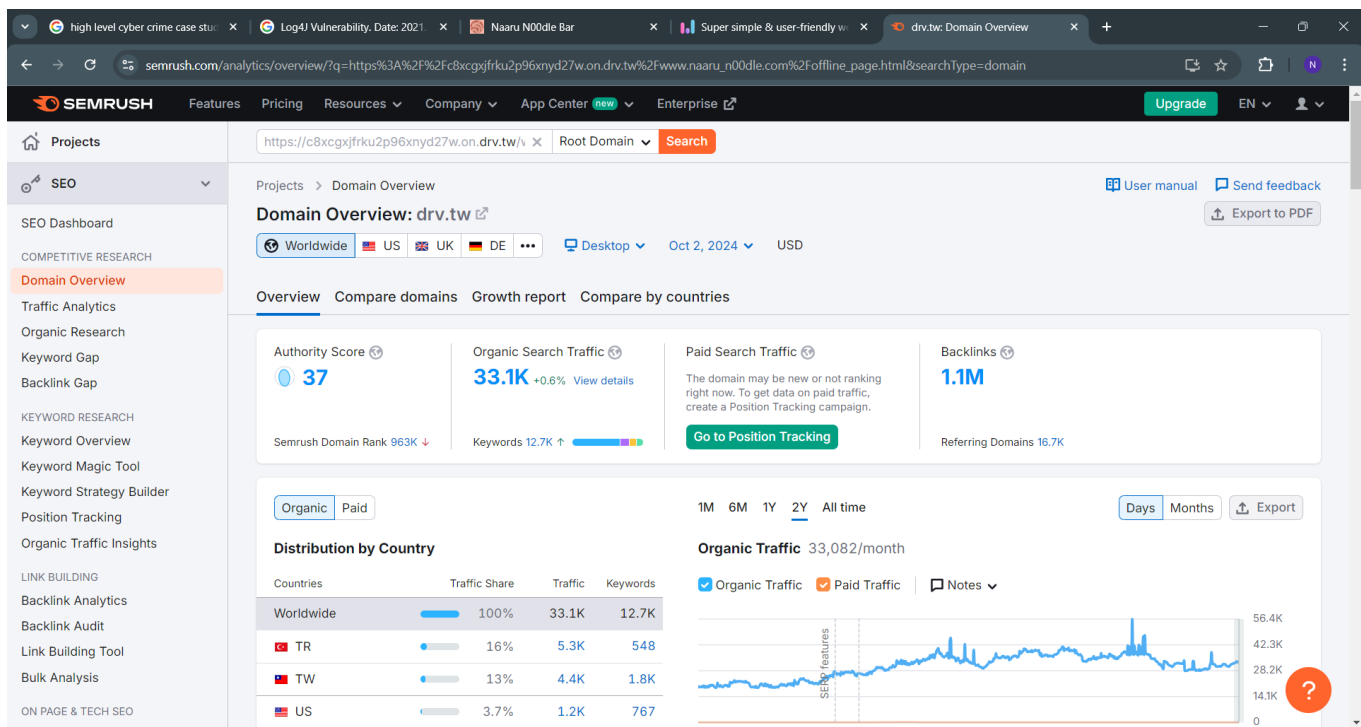

- Local by Flywheel
- XAMPP
- MAMP

### 2. Configure server settings

### 3. Test website on local server

Step 8: Monitor the website working and Traffic.

Use many free sites like google site and traffic tracker.

## Project Details

- Project Name: Naru Noodle Bar Website Clone
- Original Website: <https://www.narunoodlebar.com/>
- Cloned Website: [https://c8xcgxjfrku2p96xnyd27w.on.driv.tw/www.naaru\\_n00dle.com/offline\\_page.html](https://c8xcgxjfrku2p96xnyd27w.on.driv.tw/www.naaru_n00dle.com/offline_page.html)
- Technologies Used: HTML, CSS, JavaScript

## Disclaimer

- This cloned website is for educational purposes only.
- Not affiliated with Naru Noodle Bar or its subsidiaries.
- All content, logos, and trademarks are the property of their respective owners.

## Troubleshooting Tips

- HTTrack:
  - Check log files for errors
  - Adjust download speed
- Wget:
  - Verify command syntax
  - Check output directory
- Local Server:
  - Check server logs for errors
  - Configure server settings
